Executive Summary

The Youth Risk Behavior Survey (YRBS) has been administered to high school students in grades 9-12 in Buffalo County, Nebraska from 2000 to 2014. This project has been primarily funded by the Buffalo County Community Health Partners (BCCHP), while the State of Nebraska pays for administration to any state sampled classrooms. The Bureau of Sociological Research began conducting the Buffalo County YRBS oversample in 2007.

In 2000, the YRBS was administered to 931 students in eight high schools. In the spring of 2003, a sample of 1,228 students from nine high schools completed the YRBS. In the spring of 2007, 1,334 students from the same nine high schools completed the YRBS. In the spring of 2009, 1,331 students, also from the same nine high schools, completed the YRBS. The 2010 survey was administered to 659 students in eight high schools during the fall semester. This was a change from the traditional model of administering the YRBS in spring semesters of odd calendar years. In the fall of 2012, the YRBS was administered to 1,614 students in nine high schools. Each time the YRBS was administered, the questionnaire was modified to correspond with changes made on the Nebraska state YRBS in regard to what wording was used, and what questions were included, in the survey instrument.

In the fall of 2014, the YRBS was administered to 1,686 students from grades 9-12 in nine high schools in Buffalo County. Students were selected using random sampling procedures provided by the Centers for Disease Control and Prevention (CDC). These procedures include sampling students by school by classroom. All students in selected classrooms who were in 9-12 grades were eligible to participate. Non-sampled classes were also invited by BCCHP to participate. As a result, sampling precision estimates are not applicable to this project. The 2014 YRBS survey instrument, and the 16 additional questions specific to Buffalo County, can be found in Appendix A.

Data were collected, entered, and verified for response eligibility. Fifteen student's responses are tagged in the data set as potentially problematic. These students repeatedly provided out of range answers leading to this tagging.

The Executive Summary summarizes responses to selected questions on the YRBS, presented as trends that have been established over the seven separate administrations of the YRBS in Buffalo County. The trend data included are from seven different samples of students. They are, therefore, views of different people at different times. Variation cannot necessarily be attributed to actions or programs that might have occurred in the time between the surveys. Results of the selected data are presented by the eight areas covered in the YRBS: intentional and unintentional injuries, tobacco use, alcohol use, other drug use, sexual behavior, nutrition, and exercise.

Frequency distributions are also presented by the eight areas covered in the YRBS following the Executive Summary. The report consists of tables detailing responses for each answer for each question, presented by gender and grade.

Any questions regarding this report or the data collected can be directed to the Bureau of Sociological Research at the University of Nebraska-Lincoln by calling (402) 472-3672, or by sending an e-mail to *bosr@unl.edu*.

For the most part, trends seen in 2012 continued into 2014. Seat belt use increased over time from 61% and 42% in 2000 to 79% and 76% in 2014 with a large increase between 2012 (69%) and 2014 (76%) for males. The percentages of students who reported riding in a car with a drinking driver or drinking and driving oneself in 2014 are less than half of the percentages seen in 2000 with continued decreases seen between 2012 and 2014. The percentage of students reporting that they feel unsafe going to school remained relatively the same. The percentage of students in a physical fight decreased slightly for both females (11%) and males (23%) in 2014. Little change can be seen in dating violence. The most notable change is the increase in depression and suicide activity from 2012 to 2014 for females, especially while there is very little change if any for males.

The percentage of students reporting that they had tried smoking has decreased over time from 59% and 66% in 2000 to 27% for both females and males in 2014. The percentage of students reporting smoking in the past 30 days and smoking at least one cigarette a day in the past 30 days has decreased since 2000 with additional drops for both females (8% and 5%) and males (8% and 5%) in 2014. The percentage of students that reported chewing in the past 30 days has changed among male students decreasing from 27% in 2000 to 13% in 2014.

Alcohol Use

	2000	2003	2007	2009	2010	2012	2014	2000	2003	2007	2009	2010	2012	2014

Decreases over time can be seen for lifetime and past 30 day alcohol use and binge drinking. Females are roughly the same on these measures in 2014 as in 2012, while the percentage of male students drinking in their lifetime and recently and binge drinking continues to decrease.

Other drug use, overall, remains about the same for female and male students between 2012 and 2014. Male students are slightly less likely to have ever used marijuana (2012: 22%, 2014: 19%). The percentage of students that have ever sniffed glue also saw a small decline from 2012 and 2014 for both female (2012: 9%, 2014: 6%) and male (2012: 7%, 2014: 4%) students.

Sexual Activity

	Girls							Boys

Lifetime and past three month sexual intercourse percentages saw slight to modest changes between 2012 and 2014. The percentage of females and males that reported lifetime sexual intercourse dropped between 2012 (37% and 35%) to 2014 (32% and 31%), as did recent sexual intercourse. The percentage of students that drank alcohol or used drugs before intercourse actually saw a slight increase for both females (13% to 16%) and males (16% to 20%) between 2012 and 2014. However, condom use remained relatively the same from 2012 to 2014.

**Trend data for these questions is not available prior to 2010 as the question was new and added to the 2010 YRBS.

Very little change is seen when comparing the 2014 results to the 2012 responses. However, the percentage of students who are drinking soda or pop every day of the week continues to drop.

The percentage of students, both female and male, who were at risk of becoming overweight increased from 2012 (14% and 16%) and 2014 (17% and 19%). Relatively no change was seen during the same period though when looking at the percentage of students who are overweight.

*In 2010, the question asking about time spent exercising was changed from asking how many students were physically active for at least 20 minutes a day in the past 7 days to at least 60 minutes a day. Trend data are split accordingly.

**In 2009, the question asking about TV/Internet/Video games usage was separated into two questions: one asking about TV watching and one asking about computer use for activities other than schoolwork. Trend data are split accordingly.

Relative gains are found when comparing the responses to physical activity items from 2012 to 2014. Slightly more students reported exercising at least 60 minutes seven days a week in 2014 (24% and 43%) compared to 2012 (28% and 46%). More females also reported being active in PE class 31 or more minutes in 2014 (27%) than in 2012 (30%). More students reported playing on a sports team in the last year in 2014 than 2012. The most notable change was the large decrease in students who reported watching TV two or more hours a day for both females (2012: 41%, 2014: 29%) and males (2012: 48%, 2014: 39%). However, female students were slightly more likely to use a computer for activities other than school work for more two or more hours a day in 2014 (41%) than in 2012 (39%).

2014/2015 Nebraska Youth Risk Behavior Survey

This survey is about health behavior. It has been developed so you can tell us what you do that may affect your health. The information you give will be used to improve health education for young people like yourself.

DO NOT write your name on this survey. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

Completing the survey is voluntary. Whether or not you answer the questions will not affect your grade in this class. If you are not comfortable answering a question, just leave it blank.

The questions that ask about your background will be used only to describe the types of students completing this survey. The information will not be used to find out your name. No names will ever be reported.
